QATSOL
DEVELOPMENT

About Qatsot

Qatsol is a premier software development provider based in Qatar, with a strong presence in Europe since 2007. We offer an extensive portfolio of services tailored to meet the specific needs of diverse sectors, including government, finance, manufacturing, and education. Our expertise encompasses providing versatile and scalable off-the-shelf IT solutions, as well as developing innovative IT concepts that serve as the foundation for robust technology infrastructures across various industries.

International Reach

Recognizing the global nature of our business, Qatsol expanded beyond its home country to serve clients across three continents, establishing main offices in Poland, Kazakhstan, Germany, and Lithuania with almost 600 people on board. By the end of 2023, we found that international projects constituted over 70% of our portfolio. However, our presence in the Middle East was relatively limited. To address this, we decided to strengthen our footprint and explore new opportunities in Qatar, bringing our ready-made solutions and expertise to this promising region.

Expertise

Our expertise spans various domains, including advanced chat and communication systems, electronic government solutions, medical applications, and payment & finance solutions. Qatsol has developed robust communication platforms that enhance connectivity and streamline interactions for businesses and governmental organizations. Our electronic government solutions are designed to improve public sector efficiency, transparency, and citizen engagement, leveraging cutting-edge technology to deliver seamless digital services. In the medical field, we offer applications that support healthcare providers in delivering superior patient care through efficient data management and telemedicine services. Additionally, our payment and finance solutions cater to the evolving needs of businesses and consumers, ensuring secure and efficient transaction processing.
By extending our presence in Qatar, we aim to introduce these innovative solutions, fostering enhanced communication, more effective governance, improved healthcare services, and advanced financial transactions in the MENA region.

Team

Qatsol is a fully stacked team of IT professionals, from developers and IT consultants to data scientists and cybersecurity engineers, who ensure we can deliver end-to-end digital initiatives of any complexity. Over 50% of our talent pool are senior-level experts. We embrace agile methodologies and the Scaled Agile Framework (SAFe) approach, enabling us to adapt swiftly to changing project requirements and deliver high-quality solutions efficiently. Additionally, we are proud to hold the ISO 9001 certificate, underscoring our commitment to delivering excellence and maintaining rigorous quality standards in all our endeavors.

Clients

Our client base spans government agencies, financial institutions, manufacturing companies, and educational organizations, showcasing the wide-ranging expertise and adaptable solutions we offer. Over the past five years, we have cultivated numerous partnerships with government institutions, particularly from Europe and Baltic countries. We have collaborated with global enterprises pursuing innovative digital transformation strategies, as well as startups leveraging cutting-edge technologies to disrupt their markets.
